

FINAL VETERINARY REVIEW & APPROVAL STATEMENT

Felivis Educational Materials

Veterinary Reviewer: Georgina Ushi, DVM

Date: October 10, 2026

Materials Reviewed

- Felivis Cat Urinary Emergency Toolkit
- Felivis Senior Cat Litter Box Reset – 14-Day Plan
- Accompanying standalone guides, decision aids, symptom logs, and supporting educational materials submitted for review

Veterinary Review Confirmation

I, Georgina Ushi, DVM, confirm that I have completed a veterinary accuracy and educational safety review of the Felivis materials identified above.

My review focused on the accuracy of veterinary information, appropriate identification of urinary emergencies and other concerning clinical signs, clarity of recommendations for seeking veterinary care, and consistency of safety-related guidance throughout the educational materials.

The review included documented recommendations for corrections and clarifications. Following implementation of these recommendations, I conducted a final consistency review of the corrected materials.

The final outstanding correction, U-STANDALONE-03, involving emergency-care language in the Felivis Large-Print 24-Hour Symptom Log, was verified as satisfactorily implemented on October 10, 2026.

Final Approval

Based on the materials submitted and the corrections verified, I confirm that the reviewed Felivis educational materials have satisfactorily completed my veterinary accuracy and educational safety review.

I approve the reviewed versions of these materials for finalization and publication within the scope of this review.

Scope and Limitations

This approval applies only to the specific materials and versions submitted for review, including the documented corrections. It does not extend to future revisions, additional products, or marketing claims not included in the review.

These materials are intended for general pet-owner education and do not replace individualized veterinary examination, diagnosis, or treatment.

This statement confirms completion of an independent veterinary educational review and does not constitute a guarantee of clinical outcomes or an unrestricted product endorsement.

Georgina Ushi, DVM
